### PROFESSIONAL SUMMARY

Computer Science and Engineering graduate with hands-on experience in DNS threat analysis, identity and access security, vulnerability assessment, network and log analysis, SIEM workflows, phishing and malware analysis, and incident response.

### TECHNICAL SKILLS

Security Operations: SIEM, log analysis, incident response, phishing analysis, malware analysis, vulnerability assessment

Security Tools: Nmap, Wireshark, Burp Suite, Metasploit, Kali Linux, Aircrack-ng, VirusTotal, AbuseIPDB

Systems & Scripting: Python, Linux, Google Cloud, Git/GitHub, RIPE Atlas/Sagan, RIPEStat, MFA/IAM, SecurEnvoy

### CYBERSECURITY EXPERIENCE

#### Software Development Intern (Identity & Access Security) | LSG Teknoloji | Jul 2023 - Aug 2023

- Evaluated 5+ MFA solutions and security/integration risks; deployed SecurEnvoy MFA in a production environment.
- Created technical documentation and delivered MFA/cybersecurity training to 20+ employees.

#### Cybersecurity Trainee | Turkish Airlines Technology - Cyber Take-Off GRC | Mar 2023 - Apr 2023

- Hands-on training in vulnerability assessment, network analysis, log analysis, SIEM, phishing analysis, malware analysis, cyber defense, and incident response.

### SELECTED CYBERSECURITY PROJECT

#### DNS Manipulation Analysis | Python, RIPE Atlas/Sagan, Google Cloud, Security APIs | 2024

- Built and optimized Python pipelines to analyze 32+ GB of DNS traffic across six months and eight countries.
- Implemented manipulation detection, IP-domain matching, anomaly analysis, and traceroute/ASN investigation; processed 400 measurement IDs on a Debian Google Cloud VM.
- Analyzed 2,947 domains through VirusTotal, generating 96,016 security reports and identifying 260 malicious and 71 suspicious results.

### EDUCATION & CERTIFICATIONS

Sabancı University | B.Sc. Computer Science and Engineering | Minor in Mathematics | 2020 - 2025
